Professional Summary

M.Tech in Computer Science and Engineering candidate with a practical focus on Backend Development and DevOps. Hands-on experience delivering and maintaining a live e-commerce platform and client-facing web experiences, including Node.js/Express REST APIs, MongoDB, authentication and payment workflows, AWS/Linux production environments, Docker, CI/CD, Kubernetes, and Nginx. Focused on reliable backend services, controlled deployments, production troubleshooting, and maintainable software delivery.

Technical Skills

Backend Development	Node.js, Express.js, REST APIs, MongoDB, JWT Authentication, Firebase, Payment Integration, Git
Frontend Development	React.js, Next.js, Responsive UI, React Three Fiber, Three.js, GSAP
DevOps & Cloud	AWS (EC2, IAM, VPC, S3, ECR, EKS), Linux, Docker, Kubernetes, Helm, Terraform, Nginx, SSL/TLS, DNS
CI/CD & Operations	GitHub Actions, Jenkins, Infrastructure as Code, Containerization, Production Deployment, Troubleshooting, Infrastructure Optimization

Selected Projects

SolivaGuard – Production E-Commerce Platform & Admin Dashboard Live Website

React, Node.js, Express.js, MongoDB, Razorpay, Docker, AWS, Linux, Nginx, GitHub Actions

- Built and currently maintain a live e-commerce platform combining a customer storefront with an administrative dashboard for commerce and operational workflows.
- Built backend functionality for authentication, database-driven product/order workflows, and Razorpay payment integration to support the end-to-end shopping experience.
- Deployed the production stack using Docker, AWS, Linux, Nginx, SSL/TLS, and deployment workflows; continue to troubleshoot live issues and optimize releases and infrastructure.

Kinetic Care Gym – Client Landing Page Project Link

Mobile-First Design, Responsive Frontend, Campaign Landing Page, WhatsApp Enquiry Flow, Vercel

- Designed a mobile-first promotional page for a gym client, organizing core offerings and visitor information into a focused, easy-to-scan landing experience.
- Structured the visitor journey from campaign landing page to WhatsApp enquiry, giving prospective members a direct route to contact the business.

Jainism Cake & Cafe – Client Website Live Demo

Responsive Frontend, Menu and Product Presentation, Customer Enquiry UX, Vercel

- Developed a customer-facing café and bakery website presenting menu highlights, featured cakes, booking prompts, location, and contact information.
- Organized prominent calls to action for menu discovery, cake browsing, bookings, and customer contact, then published the frontend on Vercel.

Multi-Tier Kubernetes Deployment – DevOps Project GitHub

Kubernetes, Docker, AWS EKS, Helm, Jenkins, GitHub Actions, Microservices

- Deployed a containerized multi-tier Robot Shop microservices application on Kubernetes, configuring Deployments, Services, Ingress, and supporting service components.
- Worked with Kubernetes manifests, Helm-based deployment configuration, and CI/CD workflows to make application rollout more repeatable across environments.
- Applied cloud-native operational patterns including service discovery, load balancing, health checks, and rolling deployment practices.

Interactive 3D Shopping Experience GitHub

React.js, Three.js, React Three Fiber, GSAP

- Built an interactive shopping experience featuring 3D product visualization and real-time user interactions.
- Tuned responsive rendering, asset loading, and animation behavior to support smoother product exploration across devices.

Professional Experience

Software Engineer Jan 2025 – Present

- Owned delivery of a production web application from requirements and scope through backend implementation, deployment, and ongoing maintenance.
- Implemented backend modules for authentication, payment integration, order and administrative workflows, and database operations.
- Managed production hosting and releases across AWS, Docker, Linux, Nginx, SSL/TLS, and DNS; diagnosed issues and delivered incremental improvements.
- Coordinated requirements, project scope, estimates, and progress updates with stakeholders to support reliable delivery.

Backend & DevOps Intern Dec 2024 – Jun 2025
SyncSaS Technologies (Remote)

- Developed backend services and REST APIs using Node.js, Express.js, and MongoDB with modular application code.
- Used Docker, AWS, Linux, and Nginx to deploy, configure, and maintain cloud-hosted application environments.
- Implemented CI/CD workflows with GitHub Actions and Jenkins to automate application builds and deployments.
- Supported production debugging, infrastructure optimization, and deployment lifecycle management in collaboration with engineering teams.

Education

M.Tech in Computer Science and Engineering (Pursuing)

Bachelor of Technology (Artificial Intelligence)
G. H. Raisoni College of Engineering and Management 2022 – 2026

Training & Learning Credentials

- AWS Cloud Practitioner Essentials View Credential
- AWS Certified DevOps Engineer – Professional (Exam Preparation) View Credential
- AWS Certified DevOps Engineer – Professional (Domain 1 Review) View Credential
- AWS Certified DevOps Engineer – Professional (Domain 2 Review) View Credential
- AWS Certified DevOps Engineer – Professional (Domain 3 Review) View Credential
